

1810.10 Hazardous Waste Limited Storage Facility Operating License.

Issued January 1, 1994

SUBJECT: Hazardous Waste Limited Storage Facility Operating License.

APPLICATION: Executive Branch Departments and Sub-units that establish, conduct, manage, maintain or operate a limited storage facility.

PURPOSE: To assure the proper siting and construction and operation of hazardous waste limited storage facilities in Michigan.

CONTACT AGENCY: Department of Natural Resources (DNR) - Waste Management, Hazardous Waste Permits Unit.

TELEPHONE: 517/373-7924 or 517/373-9875

FAX: 517/373-4797

SUMMARY: An agency may establish a hazardous waste limited storage facility in Michigan, without a construction permit from the director of the DNR. However, an agency shall not establish a limited storage facility or conduct, manage, maintain or operate a limited storage facility in Michigan without an operating license from the director of the DNR.

APPLICABLE FORMS: Application for Hazardous Waste Treatment.
Storage or Disposal Facility Construction Permit or Operating License.

PROCEDURES:

Agency:

- Telephones the Hazardous Waste Permits Unit, to request the application form and to obtain technical and regulatory advice and guidance as to how the form should be prepared and submitted.
- Schedules a meeting with appropriate Unit staff to receive detailed technical and regulatory guidance as to how to proceed with the facility's application.

TSD Facilities:

- An owner/operator who is awaiting issuance of an operating license by the DNR director must operate in compliance with Act 64 and its administrative rules until an operating license is issued by the director or the facility is certified closed by the director.
- If designated as a limited storage facility, is only authorized to store hazardous waste, in compliance with its operating license.
They are not authorized to treat or dispose of hazardous waste. Limited storage facilities allow for the accumulation and storage of hazardous waste prior to shipment to a fully licensed treatment or disposal facility.
- Submits an administratively complete and technically adequate operating license application to the DNR. The requirements, similar to those required for a construction permit, include:
 - Local zoning compatibility determination.
 - Detailed engineering plans and specifications.
 - Hydrogeological report.
 - Environmental assessment.
 - Public notice.
 - Facility closure plan.
 - Financial assurance.
- Waste analysis plan.

- Inspection schedule.
- Contingency plan.
- Environmental monitoring plan.
- \$500 application fee.
